Making The Air Fit To Breathe

ScrubAir is your partner in every aspect of the total project - from concept through design, engineering, production, delivery, installation, start-up and training, troubleshooting, service and maintenance - **Guaranteed!**

#### CLIENTS INCLUDE

  
**ScrubAir**  
ScrubAir Systems Inc.

[www.ScrubAir.com](http://www.ScrubAir.com)

Transform your facility into a more productive, more efficient and more healthful work environment with ScrubAir Systems Inc. - *the preferred choice in air pollution control equipment.*

ScrubAir is a well-trusted name in the industry for high quality, custom designed, cost-effective, low maintenance, user-friendly air pollution control equipment - *guaranteed!*

Every ScrubAir project is fully guaranteed to meet or exceed existing state, federal, OSHA and EPA requirements - including the PEL standard for chromium particulate inside the building.

When you contact ScrubAir, a qualified engineer/designer makes an onsite visit to your facility - listening carefully to what you want and need. ScrubAir provides sustainable, cost-effective solutions for any issue you are dealing with - *"it's not a problem!"*

- ✓ Fitting ventilation into limited spaces
- ✓ Working within specified budgets
- ✓ Meeting client deadlines while keeping downtime to a minimum
- ✓ Planning ahead for future expansion and modifications
- ✓ Adjusting the ScrubAir schedule to accommodate client's production and shut-down schedule

## SERVICES

**Custom Design**  
ScrubAir Engineering uses the latest in Autodesk, Autocad, Inventor, and custom software to generate complete project drawings and blueprints for client approval.

**Service & Maintenance**  
Thirty days after start-up a ScrubAir technician personally follows up with an onsite visit to make sure the system is operating efficiently and the customer is satisfied.

**System Installation**  
Experienced, focused, customer oriented and thorough, ScrubAir Installers are renown for their ability to come onto a project site and put in a state-of-the-art, fully operational ventilation system within record completion times.

**Startup & Training**  
Onsite personalized startup and training is provided for every ScrubAir project, with a comprehensive operations manual written specifically for the client's system.

**Fabrication**  
ScrubAir fabricates high quality PVC, CPVC, Kynar, polypropylene and various materials per SMACNA and ACGIH® requirements. ScrubAir also provides FM Approved PVC ductwork upon request.

## EXPERIENCE

Tom O'Connor, President and CEO of ScrubAir Systems, has been working with ventilation systems and air pollution control equipment in this industry for more than 35 years. Tom's hands-on experience shaped and developed the superior technology and extraordinary service ScrubAir is known for today.

## PRODUCTS

ScrubAir provides complete turnkey air pollution control systems including hoods, exhaust blowers, scrubbers with all necessary components and control panels. ScrubAir uses Kimre™ Technology composite mesh pads for mist eliminators and Lantec Products Incorporated Q-PAC® for scrubber random dump pack media.
